

# TOB BTIII "ACMA=IIPUJIA\AJ"

### Projecting Universal Length Measuring Machine

#### Characteristics

- The wax-screen technique is adopted for the projecting screen, clear in imaging and homogeneous in brightness of the field.
- High-quality cast iron through long-term aging treatment is adopted for the base frame, strong in rigidity and good in stability.
- The double- and single-wire reading system is adopted, precise in pointing and accurate in measurement.
- The worktable can move, rotate and out-beat in every direction , convenient for the detection of parts in different forms.
- This instrument equipped with multiple accessories of tailstock, measuring hooks and caps, etc., large range in measurement.

#### **Technical Parameters**

#### Measuring range

Absolute measurement: 0 ~100(mm)

Relative measurement External size: 0-500(mm)

Internal size

While using a measuring hook: 10~200(mm) Using a electric measuring hook: 1~20(mm)

Intermediate diameters between external screws: 0-180(mm)
Intermediate diameters between internal screws: 14~140(mm)

Minimum division value: 0.001mm Measuring force: 1.5N~2.5N

#### Readout transaction data of the gauging spindle

Measurement of external sizes: 0.3 µ m Measurement of internal sizes: 0.5 µ m

#### Measurement Accuracy

Measurement of external sizes: ≤ (1+L/200) μm Measurement of internal sizes: ≤ (1.5+L/200) μm

In the formula L representing the measured size, with its unit: mm

#### Universal worktable

Division value of horizontal micro-drum: 0.01mm

Horizontal stroke: 25mm Vertical stroke: 100mm

Load capacity of the worktable: 10kg

## Maximum diameter gripped by the tailstock

When the length between 0~85, ♦ 180 mm

When the length to 200, \$20 mm

Fitting size for the measuring cap's internal diameter: \$6H7
Size of outer diameter between the reference rod and the measur-

ing cap's internal diameter: \$696

Overall Sizes of the Instrument (mm): 1000 x 370 x 620

Net Weight of the Instrument: 127kg
